### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. Claims 1-59 are pending in the application for examination.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, it is vague and indefinite why there is a need for jumping to a new desired operating frequency ? Normally, when a radio device is activated or turned on, the frequency that the device previously operated before being deactivated or turned off is used. Why the frequency that previously operated is not a desired frequency that leading to the need for jumping to another frequency ? What problem of using the frequency that the device previously operated before being deactivated leads to the need of jumping to another or new frequency is missing in the recited claim.

Due to the above problem, Examiner is unable to make any assumption that enables the Examiner to find appropriate art for rejection.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 57-59 are rejected under 35 U.S.C. 102(b) as being anticipated by Harte (US Pat No. 5,794,137).

Regarding claims 57-59, Harte teaches a method for conserving power (e.g., reducing battery drain) comprising deactivating a synthesizer while not in use (see Abstract) inherently including deactivating a voltage controlled oscillator and a phase frequency detector.

***Allowable Subject Matter***

6. Claims 20-56 are allowed.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art in general:
